

pM-KN10 | Oxygen Concentrator

pM-KN10 Oxygen Concentrator, adopt pressure swing adsorption principle, which can separate oxygen, nitrogen and other gas from the air. As soon as power is connected, the oxygen that meets medical use standards can be separated from air constantly. Planned life of the whole generator reaches up to 20.000 hours. There is no influence on indoor oxygen percent during the generator operating. Besides for adults, our oxygen producing machine is suitable for newborn infants and babies.

- 1 Flow rate: 0-10L/min
- 2 Oxygen concentration: 93% \pm 3%
- 3 Fire Safe Valve
- 4 Outlet pressure: 0.04-0.07Mpa
- 5 Noise level: \leq 52 dB
- 6 Power: AC230V (\pm 10%), 50/60Hz (Optionally 110V or 120V available according to Customer's request)
- 7 LCD display: LCD display:Pressure digital(accuracy:0.001MPa);
accumulating timing(range:0-99999hours);
present timing(accuracy:1 minute);
presetting timing(accuracy:1 minute)
temperature digital(accuracy:0.1)
- 8 Alarms: Power failure alarm, Low purity alarm, High pressure alarm,
Low pressure alarm, temperature alarm
- 9 Net weight: 27 kg
- 10 Size: 365 \times 375 \times 600mm
